ATA

Apex Traders Academy

Find the updated indicators on TradingView

by Somtoo Billionaire

Student guide - November 2026

How to add them

1. Open your chart on **TradingView** (the free plan is fine).
2. Click **Indicators** in the top bar.
3. Type the search text from the table below and click the **full name**.
4. Already had an older copy on your chart? **Remove it first**, then add it again so you get the new version.

What to search

Indicator	Type this in the search	Full name to click	Updated for the alert extension?
Bot A Scanner	Bot A Scanner 2.0	Bot A Scanner 2.0: Key Level Bias + Engulfing Entry	**Yes**
ATA Signals	Weekly Key Level Signals	Apex Traders Academy - Weekly Key Level Signals	**Yes**
ATA Scanner	Apex Traders Academy Structure	Apex Traders Academy - Structure Scanner (W / D / 4H)	**Not changed** - it does not send alerts, so no extension uses it

Not showing up in the search? Open the **Community** tab in the search window, or use the direct links below.

Direct links

Click a link, then press **Add to favorites** or **Add to chart** on the TradingView page.

Bot A Scanner 2.0	Open Bot A Scanner 2.0 on TradingView →
ATA Signals	Open ATA Signals on TradingView →
ATA Scanner	Open ATA Scanner on TradingView →

Tip: please use **Bot A Scanner 2.0**. The older public "Bot A Scanner: Level Rejection + Engulfing + Liquidity" was updated too and also works with the alert extension, but using the same one keeps everyone's signals identical.
